About

I am a web developer with 2 solid years of professional developer experience behind me. I acquired a Bachelor in Digital Media, followed with 6 months of front-end developer work experience before being hired as a junior web developer at Talent2, where I worked for 2 years learning and building up my skillset. Upon finishing my 2nd year I decided to pack up and see the world by going travelling around Europe for 6 months. My travels have now come to an end and I am keen to get back into the world of web development. I am looking for a role in an enthusiastic team developing the latest and greatest products, where I can continue to grow my skills and have fun doing it!

Technical Skills

- CSS & CSS3
- SASS
- HTML & HTML5
- Javascript
- JQuery
- Git
- Photoshop
- Illustrator
- Cross-browser compatibility
- Backwards compatibility with older browsers, such IE6, 7 and 8
- Debugging and QA
- Documentation of code and implemented features
- Experience with Bootstrap
- Experience with fluid and responsive website design
- Experience with Node.js
- Experience with Learning Management Systems (LMS)
- Experience with several WYSIWYGs such as Lectora and Articulate Storyline
- Tinkered with other coding languages such as C# and Java

Professional Skills

- Working on multiple projects at the same time
- Delivering products within a tight time-frame
- Collaborating in a team environment on projects, as well as completing individual projects
- Successfully working nation-wide with inter-state team members on projects
- Dealt with solving client issues
- Involved in entire project's lifetime, from initial proposal to final review and testing

Skills

I am very proficient in CSS, HTML and Javascript, plus I have experience with other technologies such as Bootstrap, Node.js and Adobe Software. At my previous job I worked on projects for major companies such as Optus, Westpac and GrainCorp, where I would write new code, assure compatibility with all required browsers, debug and QA the site, and provide client assistance where needed.

Professional Experience

Front-end Web Developer

Talent2 - Adelaide

2 years (1/7/2013 - 3/7/2015)

Full Time

At Talent2 I was involved in creating online learning courses for clients. Talent2's clients included very large companies such as Westpac, Commonwealth Bank, St. George, Optus, and GrainCorp. The online courses would be used by many employees of these companies and used within Australia and Internationally.

My main role was as a front-end developer, creating content using a variety of WYSIWYGs and coding from scratch using HTML, CSS and Javascript.

I also needed to do a lot of backwards compatibility

Junior Front-end Web Developer

N0prisoners - Adelaide

9/11/2011 - 31/5/2012

Work Placement

N0prisoners is a company in Adelaide that creates and designs webapps, mobile apps, websites, logos and company branding. While working there, I was taught front-end and web development, where I helped with writing CSS, HTML and Javascript for multiple projects. This included using Bootstrap and JQuery. I also designed Icons, and went through idea generation for company branding, such as the logo, colour palette and type choice.

Education

Bachelor of Creative Arts - Digital Media (2012)

Flinders University, South Australia

Other Interests

When I'm not working or developing, you can find me playing gridiron, at family gatherings, having epic LANs with my mates, reading Horus Heresy novels, and a whole bunch more.
